

TRIPATY SAHU

Engineering Manager – Mobile (Native Android)

Bengaluru • +91-8792637854 • tripati1987@gmail.com • linkedin.com/in/tripaty-kumar-sahu-07a8732b

PROFESSIONAL SUMMARY

Engineering Manager with 14+ years of experience leading Android engineering teams of up to 10 engineers, delivering enterprise and consumer mobile applications across airlines, banking, healthcare, logistics, and retail. Skilled in people management, hiring and interviewing, performance reviews, career development, budget and headcount planning, and OKR-driven roadmap ownership, alongside engineering management, mobile architecture, Agile delivery, and stakeholder management. Hands-on with modern Android development using Kotlin and Jetpack Compose, and passionate about building and scaling high-performing teams while remaining close to architecture and complex technical challenges.

KEY ACHIEVEMENTS

- 14+ years in Android engineering, including hiring, mentoring, and performance management of engineering teams.
- Led teams of up to 10 engineers, owning headcount, 1:1s, and career development plans.
- Delivered applications serving millions of users, including the Qatar Airways mobile app.
- Modernized Android architecture using Kotlin, Jetpack Compose, and Clean Architecture.
- Implemented CI/CD and engineering governance across enterprise mobile platforms.
- Certified Scrum Master and GitHub Copilot Certified.

CORE COMPETENCIES

Engineering Leadership & Delivery: Engineering Management, People Management, Hiring & Interviewing, Performance Reviews, Career Development, Budget & Headcount Planning, OKRs, Technical Leadership, Mobile Architecture, Team Leadership & Mentoring, Agile Delivery, Sprint Planning, Stakeholder Management, Engineering Governance, Technical Roadmaps, Delivery Management, Release Management, Risk Management, Cross-functional Collaboration

Android Engineering: Native Android, Kotlin, Java, Android SDK, Jetpack Compose, MVVM, Clean Architecture, MVP, Material Design, Coroutines, Dagger/Hilt, RxJava

Mobile Platform: REST APIs, GraphQL, SQLite, Room, Firebase, BLE, NFC, HCE Payments, Adobe Analytics, Boxever, Performance Optimization, Secure Mobile Development

Quality Engineering: CI/CD, Jenkins, GitHub Actions, Azure DevOps, JUnit, Espresso, Appium, TestNG, Sentry, Mobile Observability, Production Support

AI-Assisted Engineering: GitHub Copilot, Claude AI, Gemini

WORK EXPERIENCE

Senior Manager – Mobile Engineering

NTT DATA

01/2022 - Present

Engineering Manager – STAR (Campbell's)

- Led a team of 10 Android engineers delivering enterprise mobile solutions for business-critical workflows.
- Owned end-to-end mobile delivery from technical design through production deployment, improving delivery predictability across multiple releases.
- Designed modular Android architecture using Jetpack Compose and Clean Architecture, reducing development effort for new features and improving long-term maintainability.
- Integrated SAP Android SDK with Dynamics 365 and backend services to streamline enterprise mobile operations.
- Established engineering standards and code review practices that reduced production defects and improved release quality.
- Reduced technical debt through continuous architecture improvements and engineering best practices.
- Owned hiring, onboarding, and performance reviews for the team; mentored 10 engineers on Kotlin, Clean Architecture, performance optimization, and enterprise engineering practices.
- Collaborated closely with Product, Architecture, QA, and business stakeholders to deliver features aligned with customer timelines.

Engineering Manager – Dynamics Connect (Cintas)

- Led a mobile engineering team of 8 developers delivering enterprise Android capabilities.
- Implemented secure digital signature functionality for customers and field representatives.

- Partnered with solution architects on application architecture, technical planning, and engineering governance.
- Established coding standards, technical reviews, and scalable development practices across the project.
- Prioritized technical debt reduction while maintaining delivery commitments.
- Collaborated with cross-functional teams to improve release quality and production stability.

Lead Consultant – Mobile Development

ITC Infotech

03/2019 - 01/2022

Delivered enterprise Android applications for global airline and travel customers while modernizing architecture and improving application performance.

Qatar Airways Mobile App

- Migrated a large Android codebase from Java to Kotlin, improving maintainability and modern Android adoption.
- Modernized application architecture using MVVM principles.
- Integrated Adobe Analytics and Boxever SDKs to enhance customer behavior insights.
- Improved UI responsiveness and application performance through architecture modernization.
- Worked with a cross-functional Agile team of 7 engineers delivering customer-facing features.

CheckMyTrip (Amadeus)

- Developed hotel booking and car rental modules for an international travel platform.
- Implemented Apple Sign-In functionality for the iOS application.
- Collaborated with backend teams to deliver scalable REST API integrations.
- Contributed to architecture discussions supporting future application scalability.

Module Lead – Mobile Engineering

Tarang Software Technologies

01/2015 - 02/2019

Led Android feature development for secure payment and enterprise authentication platforms.

Convego App World (NPCI)

- Developed secure NFC Host Card Emulation payment functionality for Android devices.
- Implemented Material Design standards across customer-facing mobile applications.
- Improved application security through secure coding practices and ProGuard optimization.
- Automated regression testing using Appium, TestNG, and ExtentReports, reducing manual testing effort.
- Supported enterprise-grade payment platform delivery for banking clients.

EMVFIDO Auth (Samsung SDS)

- Developed secure Android authentication modules supporting enterprise compliance requirements.
- Contributed to biometric and multi-factor authentication capabilities.
- Worked closely with architects and security teams on enterprise authentication workflows.

Software Engineer – Mobile Development

Softtrends Software Pvt. Ltd.

08/2011 - 12/2014

Developed Android enterprise applications across logistics, healthcare, CRM, and workforce management. Projects included: nuDeliverIt, Workers in Motion, Mobile CRM+, Locum Scheduler, Parcel Genie.

- Developed Android client-server applications supporting logistics and workforce mobility.
- Integrated Google Maps, GPS, push notifications, and device capabilities across multiple enterprise applications.
- Delivered scalable mobile applications supporting healthcare scheduling and CRM operations.
- Collaborated directly with product owners and customers to deliver business-critical functionality.
- Contributed to multiple production releases across enterprise mobility solutions.

CERTIFICATIONS

- GitHub Copilot Certification
- Certified Scrum Master (CSM)
- GenAI Academy – Yellow Belt Level 1 & 2

EDUCATION

Master of Computer Applications (MCA)

Berhampur University, Odisha
